

October 21st – 22nd, 2009
MaRS Toronto Medical Discovery Tower

The Industrial BioDevelopment Laboratory (IBDL), Corning Life Sciences and Fisher Scientific are pleased to be offering their fourth basic cell and tissue culture workshop that consists of both lectures and hands-on laboratory training. This workshop is designed for the researcher that has not yet had exposure to cell and tissue culture and covers material including:

- **Asceptic Technique**
- **What is Cell and Tissue Culture?**
- **Basic Cell Culture Techniques**
- **Identifying and Correcting Common Cell Growth Problems**

This workshop is currently being offered at no charge to participants as part of the IBDL mandate to provide a center for biodevelopment and education.
