

# ***Real Time PCR: Basics & Optimization Strategies***

**Thursday March 4<sup>th</sup>, 2010**

The Industrial BioDevelopment Laboratory (IBDL) and Roche Diagnostics are pleased to offer an introductory Real Time PCR workshop comprised of both lectures and applied case studies. The workshop is designed for the researcher that has not yet had exposure to Real Time PCR and aims to address the following questions:

1. How has Real Time technology evolved? Applications beyond quantification.
2. How do you assess the quality of your Real Time assay?
3. How do you optimize Real Time PCR assays?

This workshop promises to deliver immediate value to participants through the development of key skills for any researcher wishing to investigate biological questions through Real Time PCR. It is currently being offered for \$65 per person however TPRM members may attend for free.

**Space is Limited!**
